

Medication Favorites

Overview

Favorites in Add Meds

You can now select from the Favorites list when adding a medication to the patient's medications list. Favorites are managed (added and deleted) from the New Rx form only. They cannot be managed from the Add Med form.

All Favorites together

Favorites are no longer organized by tabs (Account, Provider, Both). All favorites are combined in a single list. Provider favorites are now labeled with the provider's name.

Text Search Favorites

You can use any text string to search for a Favorite.

Favorites Available in Add Med

Same list of Favorites

Favorites are now available when adding a medication to a patient's medication list. The Favorites list in Add Med has the same medications as displayed in the New Rx form but do not include quantity, refill or DAW since these are not recorded when adding a medication to a patient's meds list.

Favorites are listed in alphabetical order.

Provider Favorites are labeled with the provider's name. In Figure 1, the bottom medication in the Favorites list is labeled as a favorite for Dr. Smith.

Medication Favorites

Favorites Available in Add Med (cont.)

Started By

When selecting a medication from the Favorites list on the Add Med form, be sure to check the “Started by” field. The default value selected is “Provider” (Figure 2). Select:

- **Other** if another provider prescribed this medication/substance.
- **Patient** if the patient decided to take this medication/substance.
- **Unknown** if you do not know who prescribed this medication/substance.

The screenshot shows the 'Add Med' form with a list of medication favorites on the left and a form for adding a medication on the right. The 'Lipitor' medication is selected in the favorites list and also entered in the 'Drug' field of the form. The 'Started by' field is set to 'Provider'.

Medication	Dose	Frequency
amlodipine-atorvastatin 5 mg-80 mg tablet	1 po	qd
atenolol 25 mg tablet	1 po	qd
Smith, Vivienne, MD, FACC	25 mg tablet	1 po q am 2 po q pm
hydrochlorothiazide 12.5 mg tablet	1 po	qd
hydrochlorothiazide 25 mg tablet	1 po	qd
Lipitor 10 mg tablet	1 po	qd
Lipitor 20 mg tablet	1 po	qd
Lipitor 40 mg tablet	1 po	qd
metoprolol 25 mg tablet, extended release	1 po	bid
Niaspan ER 500 mg tablet

Medication Favorites

Managing Favorites

Add Favorite

Favorites are created on the New Rx form only. They cannot be created on the Add Med form. Complete the fields on the New Rx form and click the Add button at the bottom of the Favorites list (Note: Scroll down to the bottom of the list to locate the Add button. See Figure 3). Select:

- **Add Rx to Account Favorites** to add the medication to the Favorites list without assigning a provider to it.
- **Add Rx to Provider Favorites** to add the medication to the Favorites list with a provider label. You must select the Provider name in the Provider field.

The screenshot displays a software interface for adding medication favorites. On the left, a list of medications is shown, including ramipril, simvastatin, and verapamil. The 'Zocor' entry is highlighted, and a context menu is open over it, offering two options: 'Add Rx to Account Favorites' and 'Add Rx to Provider Favorites'. The right side of the interface shows a form for the selected medication, with fields for Date (04/25/2013), Provider, Drug (penicillin V potassium), Dose (500 mg tablet), SIG (one tablet 4 times daily by mouth), Quantity (40 Tablets), and Refills (0). The 'Add' button is visible at the bottom of the list.

Medication Favorites

Managing Favorites (cont.)

Delete Favorite Favorites are deleted on the New Rx form only. They cannot be deleted on the Add Med form. To delete one or more Favorites from the list:

1. Click the Edit button at the bottom of the list (see Figure 3 on page 3).
2. Insert a check mark to the left of each Favorite to be deleted (Figure 4).
3. Click the Delete button. The selected Favorites are deleted.

The screenshot shows a list of medication favorites. Each item has a checkbox on the left. The first item, **verapamil** 80 mg tablet - 1 po bid, is checked. The second item, **verapamil** 40 mg tablet - 1 tablet daily by mouth, is not checked. The third item, **Zocor** 40 mg tablet - 1 po qd, is checked. Below the list are two buttons: 'Cancel' and 'Delete (2)'. The 'Delete (2)' button is highlighted in red, indicating that two items are selected for deletion.

<input checked="" type="checkbox"/>	verapamil 80 mg tablet - 1 po bid 180 Tablets - 11 refills
<input type="checkbox"/>	Smith, Vivienne, MD, FACC verapamil 40 mg tablet - 1 tablet daily by mouth 90 Tablets - 1 refill
<input checked="" type="checkbox"/>	Zocor 40 mg tablet - 1 po qd 90 Tablets - 11 refills

Search Favorites List

Any search variable

You can search for a Favorite in the “Search Favorites...” field (Figure 5) by any one or combination of variables. Variables in the New Rx form include:

- **provider name**
- **medication name**
- **dose (strength + form)**
- **SIG**
- quantity
- refills
- DAW

Only the variables listed as **bold** above can be used to search Favorites on the Add Med form. Quantity, refills and DAW are not used on the Add Med form.

Click the ⊗ to return to the full list of Favorites.

Figures 6 – 9 are examples of different searches.

The screenshot shows a search interface with a text input field containing "Search Favorites...". Below the field, two search results are displayed. The first result is "amlo-dipine-atorvastatin 5 mg-80 mg tablet - 1 po qd" and the second result is "atenolol 25 mg tablet - 1 po qd".

Figure 5: Favorites search field

The screenshot shows a search interface with a text input field containing "sm". Below the field, two search results are displayed. The first result is "Smith, Vivienne, MD, FACC" with medication details "atenolol 25 mg tablet - 1 po q am 2 po q pm". The second result is "Smith, Vivienne, MD, FACC" with medication details "verapamil 40 mg tablet - 1 tablet daily by mouth".

Figure 6 is a search for favorites for providers whose last name starts with the letters “sm”.
